Pain and Anxiety reduction

PROJECTS

OUR PROJECTS

The diagnosis „Your child has cancer“ throws the entire family off balance: whether emotionally, organizationally, or financially. **Löwenstern e.V.** helps quickly, unbureaucratically, and purposefully!

Here is a selection of our projects: With „**on-site care**,“ children are cared for in the hospital when their parents are unavailable or need time off.

„**Free apartments**“ near the hospital can avoid hospital stays. With the „**school robot Avatar**,“ children can participate in classes from home or the hospital and maintain social contact with classmates, as it can even be taken to the break.

„**COURAGE beads**,“ strung together on a string, tell the story of the sick child's illness, as each bead symbolizes a situation in treatment.

Devices for „**pain and anxiety reduction**“ have been purchased to improve quality of life even in the hospital.

And with „**Make a Wish**,“ a special wish is granted. For patients, but also for their siblings and families. And sometimes it's not about projects; we simply want to spread joy...
